

Ram Narayan

Software Engineer

8800977531 | ramj94907@gmail.com | linkedin.com/in/ramn1997 | Delhi, India

Dedicated and experienced Software Engineer with 5+ years building secure, scalable web applications using Angular and ASP.NET Core. Expertise in microservices, REST APIs, JWT-based authentication, SQL databases, and core data structures. Proven ability to improve application performance, strengthen API security, and deliver business-critical solutions in Agile environments.

TECHNICAL SKILLS

Languages:	C#, JavaScript, TypeScript, SQL, Python
Frontend:	Angular (v12-15), React(Beginner v19), HTML5, CSS3, jQuery, Chart.js, Kendo UI, PrimeNG
Backend:	ASP.NET Core, ASP.NET MVC, REST APIs, WCF, Microservices, JWT, Entity Framework Core, LINQ, CQRS
Database & Tools:	MS SQL Server, PostgreSQL, Azure, Azure App Service, Azure DevOps, Azure Function, Azure Blob Storage, Docker, RabbitMQ, Git, Microsoft Dynamics 365, PowerApps, Power Automate, Postman, Swagger, XUnit
Core Competencies:	Data Structures & Algorithms, API Security, Performance Optimization, System Design

PROFESSIONAL EXPERIENCE

Senior Software Engineer <i>Gallagher</i>	March 2026 - Present <i>Gurugram, India</i>
- Developed secure and scalable Insurance Marketplace applications using ASP.NET Core, Angular, and SQL Server. - Implemented JWT authentication and RBAC to secure distributed systems and prevent unauthorized access - Integrated Azure Key Vault for secure secret management and Serilog for centralized logging and monitoring - Automated application deployments and release processes using Azure DevOps CI/CD pipelines while following Agile development practices	
Software Developer <i>Birlasoft Limited</i>	Jan 2022 - March 2026 <i>Noida, India</i>
- Designed scalable enterprise microservices with secure REST APIs supporting high-concurrency and real-time processing for Fortune 500 clients - Implemented JWT authentication and RBAC to secure distributed systems and prevent unauthorized access - Improved application response time by 25% through SQL optimization, caching, and indexing - Migrated monolithic applications to Angular SPA, reducing UI load time by 40% for 10,000+ users - Integrated microservices and third-party APIs using RabbitMQ for reliable messaging - Provided L2 production support, resolving issues and maintaining 99.5% uptime SLA	
Trainee Software Engineer <i>RMSI Private Limited</i>	Jan 2021 - Aug 2021 <i>Noida, India</i>
- Developed full-stack modules using ASP.NET MVC, PostgreSQL, and JavaScript with secure authentication - Designed RESTful APIs and responsive UI components improving data reporting accuracy by 35% - Worked in Agile teams to deliver features and enhancements in iterative release cycles	
Associate Software Engineer <i>IDEMIA</i>	Dec 2019 - Sep 2020 <i>Noida, India</i>
- Built responsive web interfaces using ASP.NET MVC for global portals; secured backend with OAuth and SQL Server - Optimized database queries using Entity Framework, improving application performance by 20% - Partnered with QA teams to ensure secure, stable, and production-ready releases.	

PROJECTS

Progress Rail Business Tools (Sep 2024 - Nov 2025): Migrated K2 business app to PowerApps and Power Automate, modernizing workflow automation for rail operations

HP CDAX (Jun 2023 - Aug 2024): Built customer support automation using Dynamics 365 and ASP.NET Core, Azure DevOps, Azure Services, Azure Function and Azure Blob reducing agent resolution time by 35%

Conduent Payment Integrity (Oct 2022 - Jun 2023): Developed healthcare payment recovery platform with Angular 15, ASP.NET Core microservices, Azure DevOps, Azure Services and Azure Blob, and Kendo UI, processing \$10M+ in claims annually

Conduent Credit Balance (Jan 2022 - Oct 2022): Modernized legacy healthcare claims tools using Angular 12, PrimeNG, ASP.NET Core microservices, Azure DevOps, Azure Services and Azure Blob improving transparency for insurance providers

ANRiN (Jan 2021 - Aug 2021): Built nutrition service delivery platform for Nigeria's health sector using ASP.NET MVC, PostgreSQL, jQuery, and Chart.js, serving 5,000+ healthcare workers

Infinity Global BAP Portal (Jan 2020 - Sep 2020): Delivered SIM card monitoring and management portal using ASP.NET MVC, SQL Server, Windows application and WPF, streamlining operations across multiple regions

EDUCATION

Manav Rachna International Institute of Research & Studies <i>Bachelor of Technology in Computer Science (Cyber Security & Forensics - IBM)</i>	Jul 2015 - Jun 2019 CGPA: 6.7/10
---	--

ACHIEVEMENTS & CERTIFICATIONS

Smart India Hackathon 2019: National finalist among 10,000+ teams | **Research:** Published "Analysis of Iris Recognition" at NCNCAC

Certifications: Generative AI, Building AI Agents, Data Structures & Algorithms, Microsoft SQL Server, Azure, Android Training (IBM)
